

Teachers' In-service Training

Teachers' in-service is a continuous process in the school. Every year, the academic session begins with a seminar/ workshop lasting about a week for all the teachers on various aspects of teaching/learning process by professionals. Regular staff meetings are held in which collective evaluation takes place. The Principal gives periodic in-service during the academic year. Teachers are encouraged to attend short (one/ two days) workshops/ seminars in their subjects during the year. Regular class observation helps teachers to understand the effectiveness of their teaching performance.
